### Opis produktu

**MK MORSE Bimetaliczna Piła taśmowa L=1640 20x0,9mm 10/14** - Taśma tnąca do metalu (brzeszczot taśmowy) - stali stopowych, węglowych i konstrukcyjnych a także stali nierdzewnych i kwasoodpornych, aluminium i stopów metali lekkich

- ☐ Taśma tnąca została wyprodukowana w USA.
- ☐ Zgrzewanie odbywa się w Polsce.

Piły MK Morse są dostępne w szerokim zakresie rozmiarów i podziałki zęba, dzięki czemu można je dostosować do różnych zastosowań. Piły te są idealne do cięcia metalu o różnej grubości, w tym stali, aluminium, miedzi i żeliwa. Piły MK Morse mogą być również używane do cięcia profili metalowych, takich jak rury i profile.

#### Zalety:

- ☐ zmienna podziałka uzębienia zapewnia szeroki zakres zastosowań,
- ☐ ostrze piły ogólnego zastosowania,
- ☐ redukcja drgań i hałasu podczas cięcia,
- ☐ niski koszt taśmy tnącej,
- ☐ niski koszt jednostkowego cięcia.

#### Zastosowanie:

- Stale konstrukcyjne,
- Stale stopowe,
- Metale kolorowe.
- cięcie pojedynczych profili,
- cięcie profili w pakietach.
- cięcie na małych i średnich gabarytowo przecinarkach.

#### Opcjonalne zastosowanie:

- Stale nierdzewne i narzędziowe.

#### Wymiary:

- Szerokość taśmy: 20mm
- Grubość taśmy: 0,90mm
- Podziałka: 10/14

- Długość piły: 1640mm

MK Morse to producent wysokiej jakości narzędzi, w tym pił taśmowych i tarczowych oraz elektronarzędzi.

Firma ta oferuje szeroki wybór produktów, które są trwałe, wydajne i przeznaczone do różnych zastosowań.

Dzięki innowacyjnym rozwiązaniom technologicznym, narzędzia MK Morse są uznawane za niezawodne i cenione przez profesjonalistów z różnych branż.

| Wymiary materiału (mm) | Zębów na cal |         | Zębów na cal | Grubość ścianki (mm) |
|------------------------|--------------|---------|--------------|----------------------|
